WEDDING

SAUNDERS-HARRINGTON

A pretty wedding was solemnized last Saturday afternoon at the home of Mr. and Mrs. O. D. Harrington, Lacombe, when their eldest daughter, Hazel Marie, was united in marriage to Francis Burchell eldest son of Mr. and Mrs. A. Saunders of Lacombe. Rev. L. A. Thompson officiated at the ceremony and Marjorie Harrington, sister of the bride, played the wedding music.

The bride, given in marriage by her father, chose a white sheer floor-length gown embroidered with sweetheart blossoms and she carried a bouquet of American Beauty roses, lily of the valley and maiden hair fern. Her only ornament was a gold pendant, a gift from the groom.

Miss Ruth Harrington, sister of the bride, was bridesmaid and wore a floor-length

dress of blue silk crepe with a matching chapel veil and soft blue feather trim. She carried a bouquet of pink carnations and fern.

Mr. J. C. Faubert was best man.

A reception followed immediately after the ceremony. The bride's table was laid with a lovely lace cloth and centred with a three-tiered wedding cake topped with flowers and set in pale pink tulle.

Later the happy couple left by motor for Calgary and Banff. For going away the bride wore a turquoise blue dressmaker suit with a beige top coat and brown accessories.

Mr. and Mrs. Saunders will make their home on the groom's farm near Lacombe.

The bride was a former member of the Royal Bank staff here.

Out-of-town guests were Mr. and Mrs. S. A. Wilton, Red;

AN OPPORTUNITY

around Chinook, Youngstown, Hanna and Veteran.

One of the nation's largest companies, catering principally to farmers, needs, is ready to place a valuable contract, which should mean complete independence for a man fortunate enough to have the following qualifications - character record that will withstand investigation and proven ability to efficiently manage both himself and his own business. Financial status or age are not extremely important, but a car is necessary. Write the advertiser, P. O. Box 2216 Winnipeg, Man.

Deer, Mrs. G. Gilbert and son of Olds, Mr. and Mrs. C. Bradley of Edmonton, Miss Betty Duncan of Hanna, Miss E. Gordonier and Dorothy Cooper of Ponoka.

Mr. White, school principal, left last Friday for Alberta University Edmonton, where he is taking a special course.

Messrs. Jas. Aitken and Bill Gingles left Monday night for Calgary, where they will attend the Stampede.

Misses Marie Gilbertson and Jean Peterson left by motor on Monday for Calgary to attend the Stampede.

Mr. L. D. Butts left Thursday for Calgary where he will take in the Stampede.

Mrs. Sutherland, Intermediate teacher left Saturday for her home at Didsbury.

Miss Betty Sampson, Primary teacher left for her home at Excel.

Mr. Chas. Wyley of Hanna, former Chinook druggist was calling on old friends in town today (Thursday).

Conserving Moisture

Crops sown on summerfallow this spring will benefit from moisture accumulated since about August, 1942, as well as from rain which we all hope will fall this summer. Under average conditions, this involves about 30 inches of precipitation.

Experiments conducted by the late Sidney Barnes at the Dominion Experimental Station, Swift Current, over a period of 11 years, merit careful study by all dry land farmers. Of the total precipitation which falls during the summerfallow period of 20 months (for example, August, 1942 to April, 1944), not more than 30 percent is available to the summerfallow crop. What becomes of the rest?

1. Some percolates down through the subsoil; but this loss is negligible except in humid areas.

2. Some runs off the field.

3. A lot evaporates.

4. Too much is used by weeds.

We may ignore No. 1. Trash cover and, where feasible, contour tillage will reduce losses from No. 2. Loss from No. 3 is almost entirely unavoidable. With respect to No. 4 it is significant that Mr. Barnes considered that preventing weed growth was the most important feature of summerfallow tillage. In his experiments, wheat yielded more than twice as much when weed growth on the fallow was prevented as it did when weeds were left alone until being plowed under on July 15th.

It takes at least 300 pounds of water to produce one pound of dry seed material.

**NOW
is the time to
BUY COAL**

This year there must be no "slack season" in the Western mines. Every miner must be kept working throughout the year, if you are to be sure of your next winter's supply of coal.

So that your dealer may do his part in keeping the mines busy during this war emergency, get him to fill your bin as soon as possible.

OUR COMPLETE SHORT STORY—

TRAGEDY

— By —
MARCIA DAUGHTRY

McClure Newspaper Syndicate

Mona Montana ("the girl with the most beautiful teeth in the world") swept past—the two silent women waiting in the reception room, and entered the dressing room in the doctor's suite. She was biting her under lip nervously as she hung up her milk coat and ran a comb carefully through her magnificent black hair.

"The doctor will see you now," the nurse said, leading the way to the dental room. It was pleasant in a sterile way, with its pastel green walls, its trim shining instrument cabinet, and its white-calcined upholstery dental chair, but the actress shrugged.

"Medieval torture chamber," she said in her beautiful infected tones. "And I'll have none of your abuse," Dr. Higgins chuckled as he adjusted the headrest. "Dental work is a perfect technique when your ancestors in the theatre were jerking wood on puppets around, my lady."

"If you hadn't slept for three nights, you might not be in such jovial humor."

"It's your own fault. You'll get no sympathy from me." From a drawer, he secured a dental mirror and an explorer. "Same old trouble, huh?"

Something very like terror clouded Mona's eyes as she studied the doctor's face. He was intent on her mouth, moving the explorer around and lifting his eyebrows when she winced and uttered a short moan. "Tender, huh. Well, come into the X-ray room and we'll snap a couple of pictures. Miss Anson, did you get Mona's autograph? Wherever she goes, she expects to sign books and we mustn't interrupt the routine."

"You aren't fooling me with your merry beside manner. I know you're getting ready to give me bad news," Mona accused, minute drops of moisture forming on her upper lip. It was that accursed automobile accident, she thought. That front tooth had never been healthy since she had tried to break the windshield with it. During her last picture, the tooth had shown enough discoloration during make-up tests to need whitening each day.

With her thumb, she held the small white oblong X-ray film in place. The machine clicked. "Just compose yourself for five minutes," the doctor ordered, withdrawing into the dark-room.

Five minutes. Five short minutes to reach a lifetime verdict. The motion picture camera was so critical; it sought out things the normal eye forgot. And the technician camera was even worse. Any little blemish in her appearance, any malformation of that perfect dental smile. . . . Mona refused to think of it.

Instead, she became aware of two

small boys peering around the door at her. Their eyes were round with wonder, and their faces glowed with curiosity. "Hello," she said experimentally. They slid into the room. "What is your name?" she said to the older boy—about five. He giggled and stepped all over himself. To the little one, a dimpled child of three, she said, "Don't you know your name?"

"The sentence appeared to entrance him. "Don't you know your name?" he repeated, mimicking her inflections and the older boy took up the refrain.

"My name is Mona," the actress broke in, and they caught up that statement and made an anthem of it. The nurse arrived in a flurry of apologies. "I'm sorry if they bothered you. You see, they are so hungry to talk to strange people—to anyone who will listen. Their mother is waiting out in the reception room. You may have noticed her—she's deaf and dumb."

How unfortunate! Mona murmured conventionally. She thought, What pretty children! Then they dwindled from her mind. Suppose she should lose that tooth! A restoration might not be perfect. . . .

Dr. Higgins emerged from the darkroom, X-ray film in his hand. "Mona, this tooth will have to come out. . . ."

Mona Montana fainted and slipped quietly to the floor.

She came out of the fog slowly, mumbling. "My future. . . my career. . . ." Softly she began to cry.

"Pull yourself together," the dentist ordered. "Sit out in the reception room and plan for a husband and a home and some children. A tooth more or less won't bar you from those distinctions."

Mona sank into one of the big chairs and instantly the two boys swarmed over her. "Talk to us," they commanded. "Say things. Tell a story. Make a noise like a cow and a horse." Their mother leaned forward, her eyes enormous with concentration.

Mona told the youngsters about the three little pigs and Snow White. Her mind, swinging at a tangent, said, This is catastrophe. Why does this horrible thing have to happen to me? My teeth are so lovely. . . .

The woman across the room scribbled on a piece of paper and handed the note to Mona who took it with a ruffle of annoyance. She read it once, twice. Slowly her eyes filled. What a beast I've been! she thought. What a sniveling coward!

Tremulously she read the words again. From her purse she pulled a pad and a pen and began furiously to write.

The sentence the mute mother had written was: "Please write down all the little words my baby says."

Prefabrication Not New

Prefabricated Buildings Were Known As Far Back As 1481

Everybody knows that "prefabricated" houses of various kinds will become temporary homes for thousands when the war ends. Few people, however, know that prefabricated buildings were known as far back as 1481.

In that year King John of Portugal began the practice of sending out trading ships equipped with special prefabricated forts as protection against the native with whom they dealt. . . . One of these forts, rebuilt and modernized, is actually still in use today at Ilheus Castle, in the Gold Coast.

• Pot-pourri around the country: At Shawinigan Falls, Que., the infant son of Mr. and Mrs. Jas. Lahale fell from a second floor balcony, 30 feet, suffered only fright, no injuries. . . . C. L. McLaughlin, near Kilsyth in Grey County, Ontario, has a faithful old horse aged 30 years used for ploughing last fall, suffered its first illness in the winter. . . . At the basic training centre Maple Creek, Sask., is a full platoon of Chinese soldiers, mostly Canadian born, getting ready for action in the Pacific. . . . Ted Hawley of Progress district, B.C., got an order for 500 weasling pigs for points in the Yukon and Alaska with tentative prospect of up to 3,000 each spring for the next several years.

• Apples are big business and statistics prove that. Annapolis Valley apple growers had a net return from the 1944 crop of \$4,871,871.85, or an increase of \$559,045 over the preceding year. The commercial crop totalled 1,753,901 barrels, and this, while considerably below the originally estimated 2,000,000 barrel crop, was an improvement of 137,000 barrels over the previous year.

• In onion there is strength. Over a mile of onions. That is the record of Archie Bink at Neepawa, Man., every year. Raising onions as a hobby, he plants from 150 to 200 pounds of sets every year, having between thirty and forty rows 200 feet long. Specializing in growing and saving his seed, Archie has already sold 400 lbs. this year and has another 500 lbs. left. At one time he harvested over 2,000 pounds of onions and never had one for himself.

• If all the farmers in forest areas took the same interest in reforestation as Ed. Chappell of the 12th concession of Saugent, Ont., this country would be a model for all others to follow. He started tree planting on his farm 22 years ago, and since 1933 has planted 37,200 trees. Besides it being good business, he loves trees. In the past seven years he has put out jack pine, red pine, white pine, walnut, cedars, spruce, soft maple and elm. Ed. doesn't holler at the state to do everything but does something himself.

• The editor of the King's County Record, Sussex, N.B., gives us the benefit of some fine research. Since 1874, of the 18 Dominion elections, four have come on Mondays, six on Tuesdays, five on Thursdays, two on Wednesdays. Elections held before 1874 took more than a day to complete, the first in 1867 taking more than six weeks for polling. The first one-day election was Thursday, Jan. 22, 1874.

• Here's something with an objective, the school for adults in the

DOWN-SOUTH BISCUITS

1½ cup flour ½ teaspoon salt
1 teaspoon baking powder ½ cup all bran
½ teaspoon soda 1 cup sour cream

Sift together flour, baking powder and salt. Roll all bran into fine crumbs and add to flour. Add cream and stir until dough is formed. Turn onto floured board and roll to ¼ inch in thickness. Cut with small biscuit cutter and bake on greased baking sheet in hot oven (470 degrees F.) about 10 minutes. 2½ inch diameter.

Note: If biscuits are brushed with a mixture of egg yolk and water before placing in the oven, they will have a golden brown glaze.

CREAMED HAM (Serves 8)

6 tablespoons butter or margarine 3 cups milk
8 tablespoons flour ½ cup diced cooked ham
¾ teaspoon salt ½ teaspoon Worcestershire sauce
¼ teaspoon pepper

Melt butter or margarine in the top of a double boiler over direct heat. Stir in the flour, salt and pepper. Remove from heat and add the milk slowly, stirring until well blended. Cook in double boiler until sauce thickens. Add ham and Worcestershire sauce and heat. Serve on Down-South biscuits.

News For Gardeners

New Variety Of Lettuce Developed In United States

Lettuce is always an intriguing subject. The city man thinks, when he hears the word, that some sophisticated person is referring to "folding money." The farmer is simply interested in fact of lettuce. He will be particularly interested to learn, through the United States Department of Agriculture, that there is a new lettuce variety. This name of "Slobol" is nearest enough to please any dealer in words.

The new lettuce, say the experts, does not shoot up a flowering stalk and "go to seed" as soon as summer comes. It was developed by Dr. Ross Thompson at the Government plant industry station at Beltsville, Md., a short distance outside Washington. "It has frilled light green leaves with the very wrinkled surface known to horticulturalists as "savoyed."

It appears that propagation stocks of seed are now being distributed to U.S. growers. The expectation is that there will be enough seed for general planting by spring of 1946. Only time of course can tell whether or not "Slobol" will be what is known in the trade as a "fast seller." —Woodstock Sentinel-Review.

Had A Fortune

How The Editor Of A Country Newspaper Got Ahead In The World

The editor of a country newspaper retired with a fortune. When asked the secret of his success, he replied: "I attribute my ability to retire with a \$100,000 bank balance, after 30 years in the country newspaper field, to close application to duty, pursuing a policy of strict honesty, always practising rigorous rules of economy, and to the recent death of my uncle, who left me \$98,500." —Western Retailer.

woodlands of Quebec, known as "School of Community Programs." Running year after year, it has attracted attention all over the continent. The school this year will be held next August on the western shores of Lake Mamphramagog, a few miles from the U.S. boundary in a section of Canada where English and French Canadians have lived together since Confederation. It stands as a symbol of Canadianism. Americans join in the deliberations, farm people mix with representatives of industry and labor, and problems and their solution are tackled on a common front. The community, province and nation is the key thought in discussions, not class, creed or group.

• A new \$30,000 fruit packing and cold storage plant is being built at Yarrow, out Vancouver way, the manager for the growers estimating they will pack upwards of 12,000 tons of berries this year.

Bridge-Laying Tanks

Saved Many Allied Lives In Invasion Of Europe

One of the secret weapons that saved untold Allied lives in the invasion of Europe were the bridge-laying tanks. By using them the Allies were enabled to lay bridges across ditches and craters up to thirty-feet wide without a single man leaving his own tank or being exposed to enemy fire. In Normandy assault bridgelayers tanks were used to surmount seafort and anti-tank walls.

The bridges consist of two main types; first, those used by the Royal Armoured Corps for surmounting enemy obstacles, and second, those used by the engineers in assault. In the first category is the "acissor" type bridge that is carried folded on top of a Valentine tank; a mechanism operating from inside the tank unfolds the bridge and lays it across the gap. The Churchill bridge layer is also used by the R.A.C. It consists of a thirty-foot span steel trackway mounted on a Churchill hull, that can be raised by a mechanical pivot arm, carried forward, and lowered in front of the tank. The bridge can be laid, and the tank withdrawn to make way for other vehicles to cross, in a matter of seconds. The whole operation is performed from within the protection of the Churchill, no outside assistance being necessary.

For assault purposes the engineers use a bridge, mounted on an engineer tank, that consists of two trackways made up of hornbeam sections of a small glider bridge. The trackways are held to the tank by steel wire rope which, when released by the tank crew from inside, lowers the bridge across the gap in one place. . . .

The engineers also use a specially prepared version of the Churchill tank as a makeshift span for bridging wider gaps. For this role the tank's turret is replaced by trackways on top that are supplemented by additional trackways that project before and behind and are hinged so that they are raised off the ground. The Churchill is driven directly into the gap, the ramps are lowered, and the vehicles are enabled to pass over it.

Tank bridges of all these kinds have been used with great success in north west Europe, Italy and Burma. They may be carried in a landing craft or order of tanks may deploy and fight as quickly as possible after landing. They permit operation with great surprise, speed and good conditions without which enormous casualties might have resulted to engineer personnel.

Tractors For Europe

Will Help Liberated Countries To Start Raising Food Supply

To help liberated European countries start raising their own food supply, the United Nations relief and Rehabilitation Administration announced at Washington that it will send 14,500 tractors to be used in planting this fall's crops.

UNRRA estimates the tractors will enable cultivation of 2,900,000 acres, or enough to produce under normal conditions about 1,500,000 tons of cereals.

Director Herbert H. Lehman said 13,000 of the tractors will be obtained in the United States.

Countries receiving the tractors fall into two classes—those who are able to pay for them and those who are receiving UNRRA financial assistance. They are distributed as follows:

Paying: France 3,798; Italy, 810; Netherlands, 530; Norway, 330; Belgium, 100; Denmark, 70. Non-paying: Poland, 3,520; Yugoslavia, 2,500; Czechoslovakia, 1,500; Greece, 1,261; Albania 25.

No Nationality

Hawaiian Population Is Mostly Made Up Of Many Races

The present-day Hawaiian people are a composite of many races, the least important of which is the Hawaiian.

The thousands of Asiatic immigration have changed the physiognomy of the islands to such an extent that it would probably be hazardous to speak even of a Hawaiian nationality.

There is no common tongue, except in so far as everybody can speak English, and certainly no common cultural tradition. As the crossroads of the Pacific, the Hawaiian islands partake of a multiplicity of creeds.—Christian Science Monitor.

BUILD MORE SHIPS

In the drive to rebuild Britain's depleted merchant navy, eight vessels, totalling 37,409 gross tons, were launched from Clyde shipyards during May.

Easy Breathing

New Process

Speculum-Coated Metal Said To Be Equal To Silver Plating

Spoons and forks, plated according to a new British process, retain a lustre equal to silver without any treatment beyond washing in soap and water. This process, called speculum-coating, has been developed by scientists. It can be applied simply and directly to any metal, giving exactly the appearance of silver. Tests have shown, however, that speculum-coated metal, which has the same reflectivity as silver articles when new, registers 400 per cent. higher reflectivity in one month's exposure under identical conditions. Acids such as lemon juice, and beer, have absolutely no effect on its silver lustre. Other advantages of the coating are that it does not scratch or flake, even when articles are severely bent or twisted. It is so tough that an average coating of one-two-thousandth of an inch is adequate to give excellent protection.

Speculum plating is already being used in the United Kingdom on a wide range of products including all types of household goods and fittings.

Newspaper Policy

Maintenance Of Reader Confidence Is Of Most Importance

It is strange, and not very flattering to the human intellect, what fairy tales gain currency and are accepted. One of these fairy tales has it that advertisers dominate newspaper policy. Advertising is important to newspapers, but not nearly so important as many people think. The maintenance of reader confidence is much more important both to the newspaper itself and to its advertisers, and reader confidence would soon be forfeited if the idea got abroad that the newspaper allowed any ulterior influence to sway the opinions it expresses. —Vancouver Province.

Junior Miss Dirndl

By ANNE ADAMS

To your home-coming here you'll look like a dream in a wing-sleeved dirndl. Romantic drawstring neckline, swishy flounced skirt. Pattern 4633 is easy sewing for beginners. Pattern 4633 comes in Junior Miss sizes 11, 13, 15, 17. Size 13, frock, 2½ yards 39-inch material.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg, Manitoba, Canada, 175 McDermott Ave. E. Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

Butter was made by some tribes in Turkey by filling a skin bag with milk, tying it to a saddle and dragging it over rough ground by way of churning.

Men, Women Over 40 Feel Weak, Worn, Old?

Want Normal Pep, Vim, Vitality?
Don't wait, read now, experience makes you feel that out, out! Try Ostrin. Contains powerful tonic, stimulates, often needed after 30 or 35. Improves iron, calcium, phosphorus, vitamin B1. Shows you get normal pep, vim, vitality. It's the only tonic that costs only 35c. For sale at all good drug stores everywhere.

CHINOOK SPORTS WAS SUCCESS

The weather was all that could be desired for the Chinook Sports on Friday July 6 when after a heavy shower in the morning, the sky cleared and a bright cool day resulted. The gate receipts were very good.

The Baseball Tournament in which 6 teams were entered, provided the main attraction and created a great deal of interest was won by Acadia Valley, Oyen taking second money.

The girls Soft Ball games and Children Sport were keenly contested and drew quite a crowd of spectators. While the horse shoe pitching competition gave an opportunity for some of the older men, who are past the age for more strenuous sports a chance to display their skill and work up an appetite.

The Red Cross booth sold out early in the evening, and the profits should increase the funds to some extent.

The dance held in the Chinook Hotel ballroom in the

evening drew the largest attendance seen in Chinook for some months, and was a fitting windup to a very successful day of pleasure.

The Chinook Athletic Society has every reason to be satisfied with the results.

Former Albertan Dies at Victoria

VICTORIA, July 6 (CP) - Mrs Ethel Lesley Taylor, 56, wife of Percy W. Taylor, died here Tuesday. Born in England, she had lived near Youngs town and Strome, Alta, for 31 years before coming to Victoria two years ago. Besides her husband she leaves three daughters, Miss Mary at home Mrs. E. McDougall of Strome, and Mrs. E. Bryks of Edmonton; also two sisters and one brother in England.

Led 'First Div.' to Old Country Camp; Still With Them

WELCOMES RETURNING HEROES: Thirty-one years a Canadian soldier, (C.E.P. militia, C.A.S.F. and reserve), Seymour Tyler, Canadian Pacific Railway sleeping car porter, is unofficial greeter to thousands of the fighting men and women being rushed home now on the sleepers and liners taken out of ordinary service (above). A high point in his World War II experience was leading the First Division to trains from shipside at Greenock, Scotland, in December of 1939 as band sergeant of the Carleton and York Regiment bugle band. His most prized possession is a silver bugle, gift of Carleton and York war and non-commissioned officers, about which the King questioned him at Aldershot in 1940 (inset).

"Help—Ho. Come to the Fair"

As a combined source of information and amusement, the country fair has few competitors. It is one of the few attractions having an equal appeal to men and women, old and young. The best livestock in the community are there; the most recent improvements in farm machinery are on display; neighbours from near and far meet, often for the first time since the last fair; tests of skill, strength and luck are available to all; exhibit buildings are packed with interest and information, and a full day is rounded off in the grandstand.

The exhibit of The North-West Lino Elevators Association has established an enviable reputation on the fair circuits. This year, matters of almost universal farm interest will be featured. An attractive display showing the most important features and advantages of farm electrification will occupy the centre of the exhibit. The remaining space is devoted to weeds, insects, fertilizers, potato diseases, small fruit culture, and testing cereal seeds for smut. Everett Robertson, B.S.A., will be on hand to advise on the various farm problems with which the exhibit is concerned. Don't fail to visit us at one of the following points: Brandon, Weyburn, Portage la Prairie, Yorkton, Melfort, Lloydminster, Vermilion, Vegreville, Red Deer, North Battleford and Prince Albert.

IT'S WHAT YOU GET FOR YOUR MONEY THAT COUNTS IN BUYING TIRES

GOOD YEAR

NOW AS ALWAYS YOUR BEST BUY

HERE'S WHY!

20 years' experience with synthetic rubber.
40 years of research and experience in building millions more tires than any other tire manufacturer.
That's why the name "Goodyear" is your best guide to tire value.
If you are eligible for new tires... see us today!

GOOD YEAR
